DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 49-92 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 49-92 are rejected under 35 U.S.C. 102(e) as being anticipated by Raith, US Patent No. 6,711,408.

Regarding claims 49 and 70, Raith discloses a method (and apparatus for) of assisting at least one handover for a mobile device in a mobile communication environment with a plurality of access points, characterized by the steps :

determining an operational context as a profile of applications being executed in the mobile device before or at the time of proactive deployment of the handover decision mechanism (reads on anticipation of handoffs) (col. 6, line 44 to col. 7, line 20 and col. 8, line 14-64);

Art Unit: 2617

proactively deploying a handover decision mechanism in relation to the at least one handover and according to an operational context into a subsystem of the mobile communication environment executing the handover (col. 8, line 14 to col. 9, line 25 and col. 10, line 43 to col. 11, line 60); and

determining at least one new access point for the mobile device using the deployed handover decision mechanism (col. 10, line 43 to col. 11, line 4).

Regarding claims 50-69 and 71-92, Raith further discloses determining a current position of the mobile device as operational context and predicting a movement of the mobile device as operational context (col. 8, line 14 to col. 9, line 25 and col. 10, line 43 to col. 11, line 60).
